

BREMISE SOLUTIONS

Finely Tuned Manufacturing Solutions

LEAN Six Sigma Methodology, Implementation and Follow-up

The improvements on the right have led to capacity freeups of up to 130% which meant companies could take on additional projects and increase turnover dramatically without hiring additional personnel or expanding facilities. Bremise Solutions has also found that most companies can easily see their Return on Investment in our Consulting Service well within a year depending on the size and productivity of the company.

CUSTOMER TAILORED SOLUTION

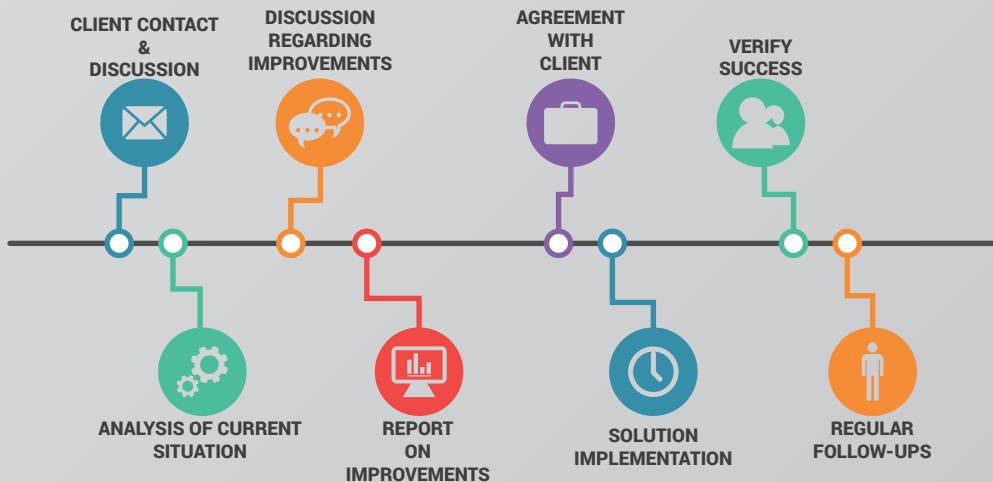

At Bremise Solutions, our consulting work is tailored entirely to your needs and painpoints. We will also in addition offer our advice based on our experience and knowledge to see what other areas we can improve and develop in addition to your requirements. Our Clients continue to be amazed by the benefits and savings we offer then though our manufacturing consultancy service.

WHOLISTIC APPROACH

Bremise Solutions takes a wholistic approach to your organising ensuring you get the best possible improvements and changes to your company that will provide the greatest benefits to your bottom line as well as your clients. With decreased lead-times and production costs these time savings can be passed onto your client to ensure you can begin to work Just In Time (JIT) to fit in with your clients schedule and remain competitive in today's market.
